

## TriTek Solutions – News Update

---

### Latest Version of CapturePlus Released

#### .NET upgrade offers additional valuable components to TriTek's CapturePlus

**BOSTON, MA** – TriTek Solutions, a leading provider of customized business process and enterprise content management systems, has released its latest version of CapturePlus which is built in C# through Microsoft Visual Studio .NET. CapturePlus software is designed to provide a flexible, intuitive interface to support scanning, indexing and committal of documents into FileNet's repositories. Although the document processing software has always offered the benefits of increased productivity, data integrity and a simplified interface, the most recent version continues to improve the functionality of the CapturePlus software to meet the growing needs of businesses.

New value-added features of the .NET version of CapturePlus include:

- *Dynamic Index & Combo Boxes* allow users to see different sets of fields based on values such as document type.
- *Dynamic Lookups* improve the efficiency of indexers by importing information from a database and auto-populating the remaining fields after a key field is entered (e.g. entering an account number dynamically pulls remaining account information.)
- *Repository Filtering* ensures that each indexer is only presented with eligible batches.
- *Extensible Plug-in Architecture* allows designated events (e.g. on end of field, on end of batch, etc) to trigger calls to a configurable plug-in, thereby providing customized processing behavior and minimizing custom coding.
- *Comprehensive Error Logging & Performance Statistics* provide managers the metrics necessary to monitor and manage the productivity of employees.

#### About TriTek Solutions

TriTek Solutions, a ValueNet partner specializing in the integration of FileNet products and related technologies, has become the leader in the design, development and delivery of customized Enterprise Content and Business Process Management solutions. With industry-specific solutions for the financial services, insurance and government verticals, TriTek is dedicated to solving the greatly varied and complex business problems of its customers. Having earned the distinguished honor of both FileNet's North American Partner of the Year and Solution Provider of the Year awards, TriTek's community-wide leadership status in the design, development and implementation of FileNet-based ECM solutions is consistently recognized.
