

## TriTek Solutions – News Update

### TriTek Announces Trans@ction eXpress 4.5

---

#### TriTek has announced the latest version of its Trans@ction eXpress framework

**BOSTON, MA** – TriTek Solutions has announced the latest version of its award-winning business process management framework, Trans@ction eXpress 4.5. TriTek's Trans@ction eXpress is a transaction processing application framework, built on top of the IBM FileNet platform, which provides a highly configurable user-friendly interface, a robust background framework, and custom processing capabilities. Version 4.5 offers significant updates to the user interface, integration with IBM CM8 repositories, and enhanced features to improve client productivity.

New value-added features of the latest version of Trans@ction eXpress include:

- **Support for IBM CM8:** IBM Content Manager Version 8 (CM8) is supported as a content repository, enabling seamless integration of CM based content with IBM FileNet BPM-driven processes.
- **Improved GUI:** Interface leverages AJAX technology, creating a more streamlined user experience with faster application response times.
- **Enhanced Search:** Configurable queries can retrieve information from external databases or systems, presenting data in the same GUI.
- **Personal Preferences:** Stored interface changes for users' local accounts, customized explicitly by the user.
- **Exposed API and Web Service:** Ability to add new functionality without changing baseline code.
- **Role-Based Security Model:** Simplified system administration with defined and controlled user access based on job functions or titles.
- **Batch Processing:** Assign standard functions, such as route to supervisor, reassign or complete, to multiple work items at once.
- **Load Balancing:** Supports multiple application servers.
- **Task Lists:** Improved processing accuracy with a procedural guide and checklist of tasks to be performed for a given work item at a given step.
- **Enhanced "Get Next" Functionality:** Support for work list filtering and sorting to determine priority order of work items.
- **Redesigned Workload Manager Tool:** Enhanced graphical representation of work distributed among queues and users working with the queues.

Trans@ction eXpress 4.5 is scheduled for a Q1 2009 release, and product demonstrations are now available. To contact a representative to schedule a product demonstration or to find more information on any of TriTek's award-winning solutions, visit [www.tritek.sol.com](http://www.tritek.sol.com).
